

NRL remit and contact information

Annex X to Regulation (EC) No. 999/2001 (Official Journal of the European Communities L Series vol 44 L147 p1-40) was last amended by Commission Regulation (EC) No. 1148/2014 of 28 October 2014. It states the requirements for TSE Reference Laboratories, sampling, and laboratory analysis methods, including the functions and duties of EU NRLs, which can be summarised as follows:

Each NRL should, for the Member State(s) it serves:

- have at its disposal facilities and expert personnel;
- verify diagnostic methods used in regional diagnostic laboratories;
- co-ordinate diagnostic standards;
- hold representative samples from confirmed cases;
- co-operate with the EURL.

Member States which do not have a national reference laboratory are to use the services of the EURL or of NRLs in other Member States.

The EURL remit and contact information is also available.
